

Credo™ Series 50M

The Proven Solution for Super-Frozen Transport

Credo™ Series 50M addresses the unique needs of long-duration shipping of frozen materials. When transporting highly valuable tissue samples and other critical contents, trust Credo to maintain continuous thermal control in the face of extended timeframes and unexpected customs delays.

Credo Series 50M maintains a super-frozen -50°C to ensure contents remain within frozen temperature-range requirements. Because of this unequalled performance, Credo eliminates the need for the environmental risk and expense of dry ice, which is often prohibited in international transport.

Credo Series 50M keeps frozen materials safe and intact during extended transport regardless of ambient temperature.

Series 50M Products

Product ID 1772	
Payload Capacity (liters/cubic inches)	17.5 / 1067.3
Payload Area Dimensions (L x W x H)	12.25" x 10.25" x 8.5"
Exterior Dimensions (L x W x H)	18.75" x 14.75" x 13.25"
Tare Weight	37 Lbs.
Thermal Performance in ISTA Summer Profile	72 Hours
Outer Container	Reusable Container
Insulator	Vacuum Insulated Panels
