**MINNESOTA THERMAL SCIENCE ANNOUNCES
PARTNERSHIP WITH ATS HEALTHCARE**

New Partnership Expands Availability in Canada

MINNEAPOLIS, Minn. – December 14, 2010 – Minnesota Thermal Science (MTS), an international provider of solutions for the safe transportation of temperature sensitive pharmaceutical, blood and biologic products, recently announced its strategic partnership with Canada’s largest, most reputable temperature controlled healthcare transportation provider, ATS Healthcare (ATS). The partnership will allow MTS and ATS to offer local support and service, as well as expand global client relationships.

Through this partnership, ATS Healthcare, a company leading the industry in temperature management and security standards across Canada, will provide sales and distribution of the MTS Credo[®] product line throughout Canada, providing clients quicker more efficient delivery and local customer support. In turn, MTS will provide local service and support to ATS’ clients in the United States.

“ATS is recognized as a leader within the Life Science industry throughout Canada. Though this relationship is extremely beneficial to both MTS and ATS, the real winners will be the clients who can benefit from superior offerings and services.” said Karl Schlenker, vice president of strategic business development for MTS. “The ability to deliver from local distribution points will shorten lead times and reduce delivery costs to our clients. The challenge within this industry segment is to ensure consistency globally; this is the next step for MTS in delivering on our promise to be a true global supplier. We recognize that this will not only enhance client relationships, but also result in stronger account coverage and broader global support.”

Among other healthcare markets, ATS Healthcare manages the transportation of medicines for many of the largest pharmaceutical companies and wholesalers in Canada. Their extensive knowledge of the industry allows them to work closely with the client in an environment they understand best.

“We are pleased that MTS has selected us as their sole distributor throughout Canada,” said Bob Brogan, chief operating officer for ATS Healthcare. “This partnership will

enhance the overall closed loop model we already offer clients today. Industry feedback has already been positive and we are excited to be able to bring this as further value to our clients”.

See MTS and ATS exhibiting at the 9th Annual Cold Chain and Temperature Management Summit that is being held in Toronto, February 22-24.

ABOUT MINNESOTA THERMAL SCIENCE

Minnesota Thermal Science provides innovative, scientific solutions for the safe transportation of sensitive tissue, pharmaceutical, blood and biologic products. The company’s reusable and environmentally-friendly containers protect contents at defined temperatures longer than any other passive thermal control product available. Minnesota Thermal Science has achieved success worldwide in technological innovation, customer satisfaction, corporate growth and industry recognition. Winner of the U.S. Army’s Greatest Inventions and the AmeriStar Awards, the company serves customers domestically and abroad across multiple industries.

ABOUT ATS HEALTHCARE

ATS Healthcare is the largest, most reputable provider in Canada's temperature controlled healthcare transportation industry. Healthcare and cosmetic manufacturers, wholesalers and their customers appreciate our reliable end-to-end solutions to their temperature management, security and other shipping requirements. Our standards are the highest, complying with Health Canada guidelines for the transportation of temperature sensitive products such as pharmaceuticals, cosmetics, medical devices and over-the-counter products.
